This release is required for all Bulk Mailer Professional customers.

## Announcements

### You're Invited: Release Webinar

Attend this webinar to see what's new in the April - May 2017 release, and to get a sneak preview of upcoming Bulk Mailer changes.

- Bulk Mailer Release Overview Webinar: Tuesday, March 28, 2017 at 9:00 AM Pacific Time. You can register on our website:  
<http://go.pardot.com/l/251632/2017-02-23/b8v2>.

The webinar will be recorded. If you can't attend, you can access the recording online after the webinar.

## New Features and Product Updates

This Bulk Mailer Professional release has the following new features and updates.

### New Features

#### ***Phone Append Data Service***

The Phone Append data service, an address quality service that you can use to add phone numbers to customer records, has been enhanced. With this improvement, more of your customer records will have the phone information that you can use to connect.

## Product Updates

### ***Mail Sort***

USPS® data files are included in this release:

- [Release 4] for the City/State file
- [Release 4] for Labeling Lists and Zone Charts
- [Release 4] for the Mail Direction File

Please see [RIBBS](#) for more information about the updated USPS Data File Release Schedule.

**Note:** Release 4 will be used for mailing dates that fall in April 2017 or later.

For more information, see [USPS Monthly Sort Data File Updates](#) for the Bulk Mailer Professional file update schedule.

### ***Address Correction***

- The March 2017 Address Correction files are included. The Address Correction files are now provided monthly. See [Address Correction Data File Updates](#) and [Address Correction Update Schedule](#) for more information.

## Changes to Operating System Support

Due to the discontinuation of the following operating system, Satori no longer will support applications on these operating systems according to the following schedule.

Vendor	Operating System	Vendor Support End Date	Satori Support End Date
--------	------------------	-------------------------	-------------------------

Microsoft	Windows Vista	April 2012	February 2017
Microsoft	Windows XP	April 2014	April 2015

## Fixed and Addressed Issues

The following issues have been fixed or addressed in this release:

Issue number	Issue description
SEAM-8837	<p>For Every Door Direct Mail (EDDM) mailings, settings in the Mail Sort wizard were not correctly applied.</p> <p>With this release, this has been fixed:</p> <ul style="list-style-type: none"> <li>• By default, in the <b>Advanced Document Settings</b> page of the Mail Sort wizard, the <b>Move Update Method</b> is set to <b>Alternative Address Format</b>. This cannot be changed.</li> <li>• On PS-3602-R1, in the Move Update Method section, the Alternative Address Format check box is automatically selected.</li> </ul>
SEAM-9368	<p>When you run Data Services jobs, sometimes the information that is in your records in the <b>Salutation</b> field is not returned with the data services updates.</p> <p>With this release, this has been fixed.</p>
